

# PEACH AVIATION

## A320 CAPTAINS: TYPE & NON-TYPE RATED

Peach Aviation is the first true LCC to establish a presence in Japan and was awarded 'Best low-cost Airline in Japan' in the Skytrax 2019 Airline Awards.

Peach is based in Kansai, Japan, and operates a fleet of 30 Airbus A320 aircraft both domestically and internationally out of Kansai, its main base, and Okinawa, a second operational base.

Peach will accept both type-rated and non-type rated pilots, and will provide the A320 rating as a part of your training. There is no bond for the rating, but a payback period of 2 years is required.

Pilots are able to reside in Japan, or take a commuting option. If residing in Japan, pilots will participate in the Japanese National Health Insurance and Pension Scheme.

A generous sign on bonus is payable, as well as other allowances such as transport allowance, moving allowance and international travel allowance, as well as exchange rate compensation.

Review our website at [www.longreachaviation.com](http://www.longreachaviation.com) or contact us for more information on this or any other position.
